THE MARKET BASKET

Fish and Flowers Give Evidence of Midsummer's Dullness.

SHORTAGE OF HOME GROWN STUFF.

New Potatoes Plenty, Tomatoes, Cucumbers Scarce, Firm.

BUTTER STEADY, POULTRY SCARCE

OFFICE OF PITTSBURG DISPATCH, FRIDAY, July 26, 1889.

Midsummer's dullness is here in the lines of fish and flowers. Home gardens are now at their best, and florists report a quiet time At the fish stalls little is doing, as is the case always at this season of the year. The case always at this season of the year. The best customers are away to the mountains or seasbore seeking recreation and rest. In fruit and vegetable lines a scarcity of home-grown stuff is reported by dealers. Said one of our leading Diamond market dealers: "For some unaccountable reason there has been a great abortage of home-grown vegetables the past week. Rains have been plenty in this section, but gardens have not come up to expectations. Tomatoes, cucumbers, peas and beans from near-by gardens have been very scarce for a few days back, and we would have a sorry time supplying our customers if we had to depend on home-grown stuff. A week or two ago cucumbers were 75c to \$1 for a bushel basket. Now they are \$2 to \$2 25. A shipper upon whom I depend for tomatoes was able to send me 4 to 6 bushels at a time a week or two ago. This morning he could only send me three quarts. There seems to be a blight on the gardens of this vicinity of late." On the other hand new potatoes are coming in freely and ough to sell cheaper than any time this season. A farmer from near Clinton says he never remembers potatoes as low in his neighborhood as now. A choice article is to be had for 50c a bushel.

Country butter is in better demand than a week ago. Poultry is scarce and firm.

Following are latest prices of market basket supplies, as furnished by leading retail dealers: best customers are away to the mountains or

MARKETS BY WIRE.

A Sharp Break in Wheat, the July Option Leading the Downward Movement Large Receipts and Better Wenther Too Much

for the Balls.

CHICAGO—The wheat market to-day has been rather nervous and spasmodic, with the feeling decidedly weaker. Opening figures were %@%c below yesterday's closing. The break really started yesterday after the close of 'Change. Trade was dull all forenoon, and fluctuations in futures beyond July were narrow. This was owing largely to the fact that the market was dominated by a prominent operator, who was a persistent buyer at 79%c for December, the object evidently being to hold the market at the "put" price of last night. The market rallied a little from the early depression, and shortly after noon broke night. The market railed a little from the carry depression, and shortly after noon broke sharply a full cent on larger estimated receipts for to-morrow and prospects of better weather and increased arrivals next week. A slump in

July over 2e helped to depress the more deferred futures. A large amount of long wheat was unloaded, and the volume of trade was very heavy during the last half of the session. A steadier and firmer feeling was developed toward the close, and prices rallied fractionally from inside figures.

A moderate trade was reported in corn early in the session, after which the market ruled rather quiet. The feeling early was rather firmer, and trading was at slightly higher prices. Transactions were in the main local, and confined largely to near tutures. The better feeling was due to shipping demand, which continues good, and added strength to July and August. As the session advanced offerings became quite liberal, and prices declined to the inside price of the day, due considerably to warm and clearing weather. The market opened at about the closing prices of yesterday, was steady for a time, then advanced \(\frac{1}{2} \) except reactions. The market opened at about the closing prices of yesterday, was steady for a time, then advanced \(\frac{1}{2} \) except reactions. A SECRET NO LONGER.

The Bayne Property Sold to a Syndicate Headed by a Lawyer.

ARTHUR KENNEDY IS HIS NAME.

Room in and Around Pittsburg for a Population of Two Millions.

NOTHING TO PEAR FROM THE FAILURE

Yesterday the name of the "party of the econd part," that is, the purchaser, in the \$100,000 Bayne sale, down the Fort Wayne Railroad, which had been kept in the background for private reasons, accidentally leaked out, and is now given to the public for the first time. Arthur Kennedy, the well-known lawyer, made the purchase, it is stated, as one of a syndicate organized for that purpose. The deal was made in anticipation of an advance in the price of real estate in that section to result from the new boulevard, or California avenue, which is hastening to completion, and rapid transit, which is assured at an early day. A year ago the price would have been considered almost exorbitant, but under the changed con-ditions it is conceded by all who know any-thing about the property and its possibilities that it was bought at a bargain.

The rapid rate at which land is being bought up and built on in the suburbs is the cause of apprehension in some quarters that the supply will soon be exhausted, or that prices will reach such an altitude as to be beyond the reach of persons of ordinary means. "These fears are entirely groundless," remarked a real estate dealer yesterday. "There is room in and adjacent to Pittsburg for a population of at least 2,000,000. We have now less than onequarter of that number. There are thousands of unoccupied acres, comprising beautiful building and manufacturing sites, within 15 or 20 minutes' ride of the heart, of the city. Many large districts are just being opened. There is plenty of room in the Twenty-third ward, which is in the Twenty-third ward, which is very sparsely settled, for a population of 10,000. The Southside has scarcely commenced to fill up, and the same may be said of the country down the Fort Wayne Railroad. This is a good time to buy, as values are certain to move up as the demand increases, but there is plenty of land for all, and will be for years to come. Fifty years from now will be time enough to talk of overcrowding."

Plans for a park at Wildwoed, the pumping station of the Wilkinsburg Water Company, on the Allegheny, are being discussed, and something tangible is expected to result in a short time. The grounds comprise about two acres, They will be handsomely improved and made attractive as a summer resort. A hotel and a number of cottages are also talked of, but they will not be built before next sometime. will not be built before next summer.

The American Consul at Amoy, in a commi nication to the State Department at Washing-ton, in regard to the adulteration of tea, says: ton, in regard to the adulteration of tea, says:
"A large percentage of the Amoyoolong is
poorly cultivated, poorly picked and cured,
dirty, and adulterated. "Stuff, it was called
by the Amoy Commissioner of Customs in his
last year's annual report, and he added that
the stuff 'was alone wanted in America." This the stuff was alone wanted in America. This is, unfortunately, true, for nearly the whole crop of Amoy colongs—bad and often unfit for use as they are—are annually marketed in the United States. The American people are better able to use and pay for a good article of tea than the people of any other nation. I am certain it is not the tea-drinking public in the United States that causes this inferior stuff to find a market only in America. It is the greed of importers and exporters that alone makes it possible to impose this vile stuff, by excessive sourcesy called tea, upon the American

The big drygoods failure in the East will scarcely be felt here. One of the oldest bankers in the city said yesterday: "The talk of such a failure precipitating a financial or any other kind of a crisis is all bosh. It will be forgotten in a week. The liabilities are so widely distributed that the offer will scarcely be distributed to the scarcel in the business world. It's a mere bagatelle as compared with the Conemaugh disaster, and that didn't bring on a panic. The business of the country is on too sound a basis to be shaken by anything less than a universal collapse. Abundance of money and an assurance of good crops lenable us to snap our fingers at such trifles as the Lewis failure."

John Blythe, of the Ashtabula and Pittsburg Gas Coal Company, has secured a controlling interest in the Shaner Gas Coal Company. He has purchased the interests of President Will-iam A. Clements and Treasurer John Craven. The colliery is located at Guffy's, on the Balti-more and Ohio road. It is a property of 208 acres, and is the key to a large tract of laud in that vicinity. The company has 100 miners at

The building of steel barges capable of carryhig 100,000 bushels of grain at a load has be-come an important business on the lakes. At Duluth, recently, the second vessel of this de-scription for the American Steel Barge Com-pany was launched and still another is far advanced toward completion. In the construction of the completed vessel about 800 tons of mild steel from the works of Carnegie, Phipps & Co. were used. The Illinois Steel Company, of Chicago, contemplates engaging extensively in the business of building steel vessels for employment in lake commerce.

The condition of the flour market, according to a Minneapolis miller, is about as follows: Prices seem to be higher than the East wants to pay, and there is a general abstention where possible to put off purchases. Some parties are possible to put on purenases. Come yas Rather shading quotations made a week ago. Rather the most favorable feature of the situation is the is easily disposed of for export, the bids of foreigners showing an upward tendency as to prices. Inquiries are also being made as to prices of patents for September and October delivery, and local millers think that if wheat values are kept on a reasonable basis on the new crop there will be no trouble about exporting our usual quots of flours of all grades. The larger holdings of stored flour here have been pretty much exhausted, though there are still 130,000 barrels at Duluth, against 167,000 barrels a year ago.

In regard to the story that he had been trying to buy the Alton Railroad, Jay Gould said the other day: "I have all the railroad I need at present. All my interests are in railroads, and I am satisfied to look after them. I am not a speculator, and I have not had a speculative interest in the market for five years. I occasionally have money to invest and I place it in railroad securities. I have made no offer for the Alton," Mr. Gould smiled when it was suggested that he had recently been borrowing large sums of money. He remarked, after a brief pause: "I am lending much more than I

Stocks Show a Stronger Front-Special Features of the Market.

Local stocks are evidently on the point of a general rally. Some of them have been quite active all week, but yesterday the upward movement affected almost everything on the board, directly or indirectly. If not better in the bidding they were backed by a more hopeful feeling, which always counts for a good deal. There was a fair demand for nearly all of the favorites, and purchasers had to pay full prices for averything they got.

The Philadelphia Gas Trust demonstrated its popularity by selling at the same price as the regular, \$7%, and the offerings were not enough to satisfy the demand. Electric was stronger, opening with a sale at 50, with 50% bld at the close. No attempt was made to revive the boom in La Noria, but there was a good demand for it at 1% and 1%. A large amount of it could have been sold at the former figure. Chartiers Valley Gas was wanted at 4%, but there was none for sale at that figure. There was none for sale at that figure. There was a sale of Citizens Traction at 80. Central was about stoady, and Pittsburg neglected.

There were indications of a revival in Pritsburg send, and a small lot of the preferred stock brought 20% an advance over ferred stock brought 20% an advance over tree was a small was offered at 23%, but nobody took the bait. There were

The Big City Shows Confidence in America Securities - A Raid on Reading Which Affects the Entire List -Everything Weak at the Close.

NEW YORK, July 26.-This was another dull and almost featureless day upon the Stock Ex-change, though the aggregate of the business done was somewhat larger than that of yester-day. The dealings, however, were on the same limited scale except income stock, and the fluctuations were confined to the same narrow range, while the result of the day's operations range, while the result of the day's operations is to leave the list with fractional changes about equally divided between gains and losses. The news of the day was of no special importance, the only rate cutting being by the Denver, Texas and Fort Worth, while the general drift of the rumors circulated was builtish. London again showed its confidedce in the values of American stocks by sending higher quotations than our last night's figures, and both London and Chicago were huvers of their Business in the local money market yesterday was of good proportions and entirely satisfactory for the season. There was a fair borrowing demand, depositing was good and checking liberal. Bates of interest were steady at 566 per cent. Small notes were rather scarce, and there was a moderate demand for Eastern exchange. There was a good supply of funds all round. The Clearing House renort was satisfactory, the exchanges being \$2.258,632 12 and the balances \$513,807 11. A banker remarked: "I think I can see an improvement in the borrowing demand in the last few days. This is the life of our business."

Money at New York yesterday was easy at 13,633 per cent; last loan, 13, per cent, closing offered at 1. Prime mercantile paper, 43,6654. Sterling exchange quiet and steady at 85% for 60-day bills and \$4.87% for demand.

values of American stocks by sending higher values of American stocks by sending higher quotations than our last night's figures, and both London and Chicago were buyers of their favorites during most of the day. The commission houses reported rather more orders from the outside, and the temper of the room his morning was bullish for a turn, which had the effect of opening the market at generally from 1/20 per cent-higher than last evening's prices, while Missouri Pacific was exceptionally higher, with a gain of 3/20 and Northwestern and Jersey Central were both lower. The early dealings were extremely teatureless though the Cleveland, Columbus, Cincinnatiand St. Louis stocks moved up sharply and soon sorred a handsome advance.

Later the movement extended to the rest of the list, and St. Paul, Union Pacific and New England took the lead in the upward movement, followed later by Missouri Pacific and Atcheson, though in none of these was the advance for more than a fraction. After noon there was the usual marked decrease in the amount of business done, but the advance met with no check, and toward delivery hour most of the list were at the best prices of the day. News came from Philadelphia, however, that Reading was disposing of its surplus gains to obtain money to complete its contemplated terminals, and a raid was made upon that stock, which carried it down i per cent, Lackawanna following. a dollar all day. There were no special influences at work, so far as known, and the weaker feeling was due entirely to the longs, who are maneuvering for a slump to enable them to buy at lower figures. Trading was brisk most of the day, but confined to small lots.

August deliveries will be yerry prompt. This will make oil more plentiful, and may have a bearish effect upon the market, particularly if prices should be as high or higher than at present. The July business has all been cleared up. The fluctuations were: Opening, 100% highest, 101%; lowest, 29%; closing, 100%. Thursday's elearings were 1,299,000 barrels.

The Acheson well, on the Mark Acheson farm, Washington county, touched the pay streak Thursday night, and shows for a good well. It was shut down and the work of connecting the well with the tank commenced. When this it finished it will be drilled in. If this well proves good, it will be an important one, as it will materially extend the territory south. Twelve wells are now ready for drilling near this one and one waiting for the result from the Acheson.

The Clark well is nearly through the Gantz sand with no increase in production. It will be light. Conkle's Mason lot well is through the sand and good for 16 barrels per hour. The Lustick and Mitchell Linton gushers are still holding up good. Harding No. 2 is in the top of the 50-foot sand and good for 60 barrels per ay. The Smith lot well of the Mohawk Oil Company was in the sand Thursday with no show of oil. It looks like a failure. Five wells were due yesterday. The Harding No. 1 is getting some very peculiar oil in the "Big Injun" sand. It resembles the product found in Butler county. MEXICAN EXPERIENCES are to perrow's DISPATCH in a bright and ch ner by L. B. France.

Our little girl when but three weeks old broke out with eczema. We tried the prescription from several good doctors, but without any special benefit. We tried S. S. S., and by the time one bottle was gone, her head began to heal, and by the time she had taken six lottles she was completely cured. Now she has a full and heavy head of hair—a robust, healthy child. I feel it but my duty to make this statement. H. T. SHOHE, Rich Hill, Mo. 53 Send for our Books on Blood and Skin Diseases and Advice to Sufferers, mailed free, fel-7-TTS
